

# Cosmic Communications

## Expert to Speak at Berkeley Lab

### ***Christopher Rose***

***Rutgers University***

MONDAY, JULY 25 \* NOON  
BUILDING 50 AUDITORIUM

### ***Write or Radiate? Inscribed Matter vs. Electromagnetic Communication?***

Christopher Rose made headlines last year with his proposition that in trying to contact extraterrestrial civilizations we might be better off launching information-bearing physical artifacts rather than electromagnetic signals. The author of this premise will discuss what he calls “opportunistic communications” in a special talk at Berkeley Lab.
