

Exercises for Lecture 3

L^AT_EX Workshop

9 March 2014

1 Figures

Find two pictures of rabbits on the internet and add them to our example from class. Use the `figure` environment for one rabbit and the `wrapfig` environment for the other. Give the new figures captions and labels and reference them.

2 Counters

Make the following lists. Feel free to replace the sentences with something less harebrained; the important part is the labels.

The first list:

(I) A male rabbit is called a buck.

[1] Do not confuse “buck” with “deer”

[2] Do not confuse “buck” with “luck”

(II) A female rabbit is called a doe.

A: Is Jane Doe a rabbit?

1) The jury is out on this question.

B: Does Jane Doe like rabbits?

(III) A baby rabbit is called a kit.¹

The second list. You’ll need to change the counter and the label each time.

b) Meadows

“C” Woods

V) Forests

VII Grasslands (use `\textsc`)

[11] Deserts

13 Grasslands

¹Baby rabbits are also called kittens.
